Mario A. Luna Lecture Series

Presents

Isabel Fonseca, MD, PhD
Professor, Departamento de Patologia Morfológica
Instituto Portugês de Oncologia de Francisco Gentil
Lisboa, Portugal

What Have We Learned on Salivary Gland Tumours in the Past Few Years?

In recent years, salivary gland tumours have been extensively studied and novel information on their molecular characteristics unravelled. However, conventional histopathology remains the gold standard for diagnosis and therapeutic decisions. The discussion will focus on the clinical impact of tumour grading and the understanding of mechanisms of tumour progression of salivary neoplasms.

Friday, November 16, 2018
11:00 a.m. – 12:00 p.m.
Russell Conference Room, G1.3741

In Memory of Dr. Mario A. Luna

It is the policy of The University of Texas MD Anderson Cancer Center that the program chair(s), planning committee member, faculty/teacher/author, or CME activity reviewer must disclose any relevant financial relationships with commercial interests whose products may be discussed in the activities, if any. MD Anderson also requires that faculty disclose any unlabeled use or investigational use (not yet approved for any purpose) of pharmaceutical and medical device products.

Specific disclosure will be made to the participants prior to the educational activity.
